

Waterless Antiseptic Hand Sanitizers

ESI manufactures a variety of waterless hand sanitizers to meet the need of any environment. We offer a 62% ethyl alcohol based product as well as a .1% Benzalkonium Chloride. Both are available in a gel or foam. ESI's Servo-Stat™ Balm, a 62% alcohol based sanitizer also contains a special lotion to help soothe the skin after repeated use. All of these products are available in 16 and 32 ounce pump bottles or 1000ml bags that fit the ESI wall dispensers.

SERVO-STAT™ BAC HAND GEL AND FOAM:

- Contains .1% Benzalkonium Chloride, which exceeds FDA standards for an antiseptic
- Kills pathogenic organisms almost on contact, producing a 99.999% kill in just 15 seconds
- Unique non-alcohol formula that is non-drying to the skin, which leaves hands smooth and soft
- Gel consistency which prevents waste and evaporates quickly with normal washing techniques

SERVO-STAT™ FOAM, BALM AND GEL:

- Kills pathogenic organisms almost on contact, producing a 99.999% kill (5 log reductions) in just 15 seconds
- Unique non-drying formulas that leave hands feeling soft and smooth
- 62% ethyl alcohol, a proven antimicrobial agent against a broad range of gram positive and gram negative bacteria and fungi
